Research Support

Current

Principal Investigator (multiple PI with Julien Teitler, Columbia University), “Gestational Age, Obstetric Interventions, and Child Health.” With Peter Bearman, Thomas Hegyi, and Kayuet Liu. NICHD Grant 1R01HD090119. Project period: 09/11/2017 – 05/31/2021. \$1,488,179.

Using linked vital statistics data from the states of NJ and CA, this project: (1) Documents trends and patterns in gestational age (GA) and method of delivery in low risk pregnancies and conducts analyses of spatial diffusion of elective interventions. (2) Estimates effects of GA and method of delivery on autism and other developmental outcomes in low risk pregnancies and assesses the contributions of changes in GA and delivery methods to trends in child disability. (3) Explores salient neonatal outcomes as pathways.

Principal Investigator, “Effects of Maternal Employment on Adolescent Social and Health Behaviours.” With Hope Corman, Dhaval Dave, and Ariel Kalil. NICHD Grant 1R01HD086223. Project period: 09/30/2016 – 05/31/2020. \$1,166,852.

This project investigates the effects of the dramatic restructuring of the cash assistance system for poor families in the US in the 1990s on a large array of social and health behaviors of adolescent children, using all appropriate publicly-available datasets and both traditional and new innovative methods. It explores potential heterogeneous effects (e.g., by age of youngest child, child gender, mother's welfare history), effects of timing and duration of exposure to welfare reform, and the roles of maternal employment, income, and supervision as pathways between welfare incentive policies and adolescent behaviors.
